

The Day I Found Your Love

**When love's a stranger to you in the night
And the feeling tells you, out of sympathy
To open up your wings, turn your head to the sky
Take off like a bird, let your heart be free**

**I found deep feeling devotion
The day that I found your love**

**I can see above the diamond-studded sky
Hear the sound of night life passing by
Scent the early morning with every breath of air
Taste the secret potion that we both share**

**I found deep feeling devotion
The day that I found your love**
